

PENINSULA PONDERINGS FALL 2016

THE MARBLEHEAD BANK - THREE CONVENIENT LOCATIONS

Something New is Happening at The Marblehead Bank

On August 22, 2016, The Marblehead Bank introduced a newly updated internet banking program. With this update, the program will be compatible with most mobile devices.

Although the pages may look different, there will be no change to ID (username) or password, and Bill Pay information will remain the same.

Marblehead Merchants Group

By the time this edition of Peninsula Ponderings hits your hands some of the Fall festivities that the Marblehead Merchants have planned for the community will have past. However, we urge you to check out this group that has come up with such great activities and events in our community. You can check out their calendar of events on Facebook under Marblehead Merchants Group. And don't forget The Marblehead Police Association will hold their annual Christmas Tree Lighting ceremony on Friday, November 25. The community will usher in the chilly winds of December with the annual Village Lights celebration on December 3. The Merchants Group will line Main Street with luminaries, their retail shops will have extended hours and special sales; there will be free gift-wrapping, and maybe even a visit from St. Nick himself.

12 Ways to Protect Your Mobile Device

1. Use the passcode lock on your smartphone and other devices.
2. Log out completely when you finish a mobile banking session.
3. Protect your phone from viruses and malicious software, or malware, just like you do your computer by installing mobile security software.
4. Use caution when downloading apps. Apps can contain malicious software, worms and viruses. Beware of apps that ask for unnecessary "permissions".
5. Download the updates for your phone and mobile device.
6. Avoid storing sensitive information like passwords or a social security number on your mobile device.
7. Tell your financial institution immediately if you change your phone number or lose your mobile device.
8. Be aware of shoulder surfers. The most basic form of information theft is observation. Be aware of your surroundings, especially when you are punching in sensitive information.
9. Wipe your mobile device before you donate, sell or trade it using specialized software or the manufacturers recommended technique.
10. Beware of mobile phishing
11. Watch out for public WiFi. Public connections are usually not very secure.
12. Report any suspected fraud to your bank immediately.
